FYI- please see message below. I think they will take care of this for you. You can keep eye on eDan after a few days and hopefully you'll see it scanned in there. - Krista

Donna, Cathy:

IFW, eDan include an entry for a 903 but when you open it up you discover that it is not a 903 but some other document. Further, neither Krista nor myself have been able to find the 903 under any other doc code. I tried to print out a copy of the 903 using the preexam software but was not able to obtain the 903 from there either. It appears that this 903 may not have been prepared using the preexam software because when I tried to open the 903, the preexam software gave me an error message that no image was available. Could you see that a copy of the 903 is scanned into IFW so that the examiner can complete processing of this application.

Thank you and happy holidays!
